# HAZARDOUS SUBSTANCES: SAFE STORAGE AND USE

CEMO enables you to optimally store and process flammable, poisonous, explosive and harmful substances. With our surface protection systems, sumps, drip trays, tanks and trolleys, you keep safe in everyday working life.

# Safe Storage

## Safely store hazardous substances...

- ✓ Minimal risk with approved spill pallets
- ✓ Durable spill pallet materials minimise the procurement overhead through long life
- ✓ Modular spill pallet systems allow simple custom storage solutions
- ✓ A range of different spill pallet materials allows different solutions from a single source
- ✓ Application-specific spill trays and bunds for canisters, barrels, IBCs and pallets

### Spill Pallets and workfloor protection systems

**GRP\***: recommended for diesel, fresh and used oil, weak alkalis and acids

**PE\*\***: recommended for alkalis and acids

**Steel**: recommended for petrol and highly flammable liquids

\*Glass-fibre Reinforced Plastic

\*\*Polyethylene

# Safe Supply

## Use hazardous substances safely...

- ✓ Stationary and mobile solutions make you independent in your company
- ✓ Stationary indoor and outdoor versions allow almost any installation location
- ✓ Mobile versions for lubricants, diesel, AdBlue and other fuels

### Stationary (CUBE Tank Systems)

**Compact system** with approval for on-site use with fresh and used lubricants

### Mobile (Trolleys)

**Lubricant trolley:** the practical solution for filling vehicles on site

**Caddy:** Mobile solution fulfilling screen wash and radiator antifreeze

**Trolley für AdBlue®:** Mobile refilling solution for AdBlue in the workshop

**Extraction trolley:** Mobile mobile device for extraction of fuels in the event of misfuelling

# The right product for every hazardous substance

## Collection Systems

Bunds, Spill Pallets and workflow Protection Systems

### Bunds and Spill Pallets

- ✓ Modular bund concept offers full flexibility due to the combination of the bunds and gratings as required
- ✓ Extremely cost effective in comparison with other materials (GRP)
- ✓ Universal application for waste oil, lyes and acids (GRP)
- ✓ Very high chemical resistance to aggressive acids and lyes (PE)
- ✓ Options for versions with feet, locating cams, brackets or castors
- ✓ Steel versions for flammable liquids

### Ground protection systems

- ✓ Simple combination of standard spill pallets using connector elements
- ✓ Robust GRP and galvanised steel grating
- ✓ Able to be combined with all HD spill pallets types and sizes
- ✓ Approved for water-contaminating and flammable liquids
- ✓ Connection components permit the lining of surfaces of any size that are suitable as storage and transfilling stations

# Safety Cabinets

Storage of hazardous materials according to regulations

## Environmental Cabinets

- ✓ Safe storage of water and environmentally-hazardous materials in buildings
- ✓ Lockable doors to prevent unauthorised access
- ✓ Ideal for storage of pesticides

## Safety Cabinets F- Safe

- ✓ Fire protection 90 Minutes
- ✓ Doors with thermally-activated closing in the event of fire
- ✓ GS- and CE-marked

## Battery storage and charging cabinets FWF 90

- ✓ Fire protection 90 minutes
- ✓ Ideal for storing and charging lithium ion batteries
- ✓ Minimal risk of fire spreading during the charging of lithium ion batteries

## Stationary (CUBE Tank)

Effortless refuelling indoors and outdoors

### Compact lubricant system

- ✓ High level of safety due to integrated bund
- ✓ Gear pump 230V, 9 l/min, 12 bar
- ✓ Outdoor version with lid for installation outdoors
- ✓ Suitable for engine, gear and hydraulic oil up to SAE 140
- ✓ Premium version with 8 m hose reel

### Used oil compact system

- ✓ High level of safety due to integrated bund
- ✓ Integrated funnel with dirt sieve
- ✓ Integrated draining board for oil-contaminated components
- ✓ Outdoor version with lid for installation outdoors

## Mobile (Trolleys)

Flexible refuelling and refilling

### Lubricants (60/100l)

- ✓ Easy handling with integrated handle and hand-grips
- ✓ Safe transport with integrated baffles
- ✓ Portable dispensing of engine, gearbox and hydraulic oils and AdBlue
- ✓ Gear pump 12 V, 4,5 l/min, battery and charger

### AdBlue (60l/100l)

- ✓ Easy handling with integrated handle and hand-grips
- ✓ Safe transport with integrated baffles
- ✓ Portable dispensing of AdBlue
- ✓ 12 V pump with Elaflex Auto Nozzle, battery and charger

### Petrol Extraction (95l)

- ✓ Ideal for misfuelling, accidents and vehicle return
- ✓ Suitable for 2-stroke mix and diesel
- ✓ Increased safety with flashback arrester in device
- ✓ Flexible with 12 V VDC pump

**CEMO - your reliable partner since 1960**

CEMO is one of the leading companies in the field safe storage of hazardous substances. CEMO originated from a two-man farm in the Swabian town of Weinstadt, which was involved in the production of grape butts and containers made of glass-fibre reinforced plastic. Today, the product range includes refuelling tank stations, pumps, transport and storage containers, winter service products, and storage facilities for hazardous materials in workshop and business. More than 230 employees at the sites in Weinstadt, Schnelldorf and its subsidiary in France advise customers worldwide from a wide range of industries on safe solutions for storing, conveying and dispensing of liquids and solids in buildings and on site. Quality and longevity are our top priorities when it comes to the manufacture of storage solutions for hazardous materials. In-house product development and manufacturing expertise, in conjunction with global procurement, are the basis for the quality and durability of CEMO products.
