

COMM UNITY

From groundscare to winter service.

Sustainable product solutions
from a full-range supplier

Safe roads and pavements

Rely on robust products from CEMO that will give you loyal service for many winters.

- Robust GRP grit bins and corrosion-resistant grit spreaders
- High quality snow shovels and snowploughs
- Mobile Spray Caddies

Well-tended green spaces

Maintain your green spaces, parks and sports facilities professionally.

- Sturdy tanks and rectangular containers
- Mobile irrigation systems
- Practical Aqua Caddies
- Cleaning and weed control systems

Experience

Products with added value, expert technical advice, extensive training: With CEMO you get everything from one source.

Sustainability

Durable, repairable and recyclable: environmental protection is a priority in the development and production of our products.

Constant partner - constant products

As a full-range supplier, we have been developing and manufacturing innovative solutions for safe storage, transporting and dispensing for over 60 years. The best protection for humans and nature is just as important as the use of high-quality materials. From hazardous material storage to winter road maintenance, from flexible tank systems to efficient irrigation systems: In our comprehensive range you will discover products that suit you. Choose a constant partner with decades of know-how. Benefit from durable solutions. And increase safety - with products you can rely on!

**Well equipped:
from irrigation
systems to tank
systems**

Vehicles and equipment always ready for use

Make your community more mobile.

- Mobile filling stations for diesel, petrol and AdBlue
- Robust toolboxes
- Practical vehicle boxes

Safe storage

Store hazardous substances safely.

- Spill trays and drum racks
- Hazardous material containers, cabinets and collection containers
- Charging and storage cabinets for lithium batteries
- Practical boot cleaner

Quality ✓

Resistant materials and intelligent design enable efficient, long-term use in your company.

Safe streets, spaces and pavements

Reliable products for winter maintenance

As a specialist in safe, tried and tested winter maintenance products, we offer a wide range of equipment for the cold season. Professional products are available for practically all applications. Our new battery-operated Spray Caddy, for example, allows up to 60 litres of de-icing agent to be used even in hard-to-reach areas, or to

spray vertical surfaces and objects to which solid road salt does not adhere. Instead of salt brine, biodegradable solutions of various substances can be used. On flat surfaces, the classic GRP grit containers and pedestrian grit spreaders continue to be the ideal solution.

Spreader

With the CEMO spreader you can distribute a variety of gritting materials quickly and easily.

- Suitable for various spreading materials
- Adjustable spreading width limiter
- Axles made of robust stainless steel
- Drop spreader also available

Snow ploughs and snow shovels

Free pavements and public places from snow without damaging your back - with our GRP snow shovel or the angle-adjustable steel snow plough.

- Durable and corrosion resistant
- For efficient, ergonomic work
- Smooth surface prevents snow from sticking

Stackable
with closed
stacking lid

Grit bin Plus3

Shovel
chute

Smooth surfaces
Less contamination
Residue-free emptying
Easy cleaning

Forklift pockets for pallet truck
and forklift (optional for 200 and
400 L versions)

Grit bins

Use grit bins or the Go-Box to store gritting materials in a safe place.

- Corrosion and weather resistant
- Easy opening and closing
- 10 years warranty on all GRP bins

Spray Caddy

The spray caddy holds 60 litres of thawing agent. Thanks to the on-board rechargeable battery, you can distribute it flexibly and quickly almost anywhere.

- Electric pump 12 V, approx. 6 l/min
- 8 m spiral hose
- Spray lance with flat spray nozzle

Well-kept green spaces and parks

Mobile irrigation system

Even in the summer months there is an increase in the work in the municipal sector. Increasingly hot and dry periods require regular maintenance of public green spaces. Daily irrigation is often required, which places higher demands on mobile water supply. We therefore offer you professional, mobile irrigation systems that make you independent of the electricity and

water network. You can reach even the remotest places with the battery-powered Aqua Caddy. For environmentally-friendly weed control, we offer you a system that is chemical-free and only uses hot water. The 600 litre water capacity makes it suitable even for large areas.

Sustainable Irrigation solutions

NEW

Mobile cleaning and weed control system CEMO MCS 1000 HD

Tanks

For the transport and storage of water

- GRP or PE
- Oval, box or trunk-shaped
- 600 - 5,500 litres

Mobile irrigation systems

For mobile watering of green areas

- GRP or PE tanks
- Electric or hydraulic pump
- 125 - 6,000 litres

Mobile cleaning and weed control system

For chemical-free weed control using only hot water

- PE rectangular tank
- Heated Kärcher high-pressure module
- 600 - 2,000 litres

Rectangular containers

For transport and storage

- High-strength GRP
- Corrosion resistant and extremely light
- 100 - 4,500 litre capacity

Aqua-Caddy

For watering in places that are difficult to access

- PE trolley with handles and wheels
- Electric submersible pump with battery and charger
- 60 litres

Ready-to-use machines and vehicles

Mobile products for your community

Our mobile refuelling stations ensure that your vehicles and equipment are always ready for operation, regardless of whether you need diesel, petrol or AdBlue on site.

Naturally all our refuelling tank systems comply with the regulations for the storage and transport of fuels so that you are safe and legal.

Tank systems for petrol

Equip your community with suitable petrol filling stations.

- Canisters in different sizes (5 L - 25 L) and types
- Mobile petrol filling stations, such as the CEMO KS MOBIL EASY made of PE

Diesel, petrol and lubricant trolleys

With mobile, cable-free trolleys from CEMO you can refuel in any terrain.

- Easy transport due to large wheels
- Built-in LiFePO4 battery
- Can be used upright or horizontally

With a CEMbox or vehicle box your equipment and tools are also safely stowed away for transport.

CEMbox / Vehicle box

Store your tools protected in the CEMbox. Or transport them safely in the PE vehicle box.

- Safe transport and storage
- Easy handling with forklift or crane
- Lockable lid

Mobile tank systems for diesel

Easy handling when full, **forklift pockets**

Mobile tank systems for lubricants

Securing during transport
Recesses for ratchet straps

CEMO DT MOBIL EASY

Refuel municipal diesel vehicles at any time of day or night.

- Integrated hose holder
- Isolation valve for safe transport
- Easy handling due to forklift pockets and carrying handles

CEMO MOBILE EASY

Use the CEMO MOBIL EASY for fresh engine, gear and hydraulic oils.

- Made of robust polyethylene
- Integrated nozzle holder
- Forklift pockets and handles

Safe storage - maintenance depot

Professional solutions for your warehouse

When it comes to the safe storage of environmentally hazardous materials in your maintenance depot, you are in the right hands. No matter whether you need to store or decant oils or

chemicals, or store or charge lithium batteries for your tools, we have the solution for everything. This makes your depot a real example of active environmental protection.

Spill trays and filling stations

Store environmentally hazardous substances on precisely-fitting spill trays/bunds or in storage/filling stations.

- Spill trays/bunds made of PE or GRP
- Filling stations with DiBT approval
- PE surface protection systems for lining large areas

Shelves, cupboards and containers

Store small and large quantities of hazardous substances safely and neatly.

- Shelving systems for small containers and drums
- Drum racks for the storage of 200 L drums
- Safety, environmental and chemical cabinets

Collection stations

In CEMO's pollutant collection stations you can store hazardous substances optimally - both indoors and outdoors.

- With splash protection wall
- Suitable for liquids of all water hazard classes
- General technical approval
- Available as indoor and outdoor versions

Everything for the storage of Li-batteries

Charge, store and transport lithium batteries safely to minimise the risk of fire.

- Tested battery safety cabinets FWF 90
- Charging cabinets with special safety features
- Collection container for storing defective batteries

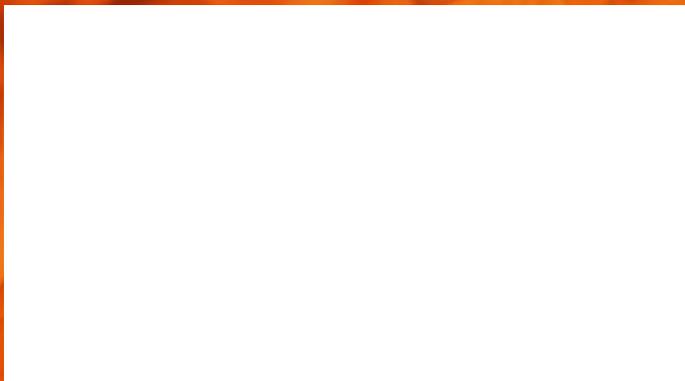

NEW

Boot cleaner

Clean your boots quickly and easily.

- PE-boot cleaner with sump for dirty water
- Boot cleaner ECO with stainless steel handle and pipes
- Optional scraper grate for coarse dirt
